

**All students undertaking an award within Institute of Health & Nursing Australia with a clinical/work experience placement component are required to ensure immunisations are up to date.**

Please read the following information carefully:

- All students attending clinical/work experience placement are required to provide an up to date immunisation record to staff at their allocated placement venue before they can begin their clinical/work experience placement. **In WA they must show proof of immunity (not just proof of immunization) for all childhood and adult vaccinations.**
- Failure to comply with the requirements may jeopardise completion of your studies. Students cannot undertake clinical/work experience practice until these clearance requirements are attended to.
- You must carry your proof of immunity or vaccination with you at all times when on clinical/work experience placements.
- For healthcare students who were born overseas or have lived overseas in a high TB incidence country for more than 3 months, screening for Tuberculosis will also be required.
- All decisions regarding the appropriateness of an individual to undertake a placement is entirely up to the placement venue and the Institute takes no responsibility for these decisions.
- As a condition of placement, students are required to review the information regarding the evidence required for vaccination and serology (blood tests) before completing and submitting all required documentation.
- You could also take this with you to your General Practitioner (GP) when requesting vaccination/ serology (blood tests) or documentation to ensure that they provide the correct documents required.
- Records of vaccinations and proof of immunity that were received from overseas must be in English (translations must be certified) and contain enough information about the vaccine (e.g. brand, active components, batch numbers, if available) and vaccination date to enable an assessor to determine if they fulfil the requirements. from overseas must
- Please attach a copy of your immunization records or evidence of immunity with this completed form.

**Evidence required for vaccination/immunity**

**For each disease requiring evidence of vaccination provide at least ONE of the following:**

1. Documentation on an Adult Vaccination Card (AVC) or immunisation card equivalent
2. Included in a statement from a GP Practice on the Practice letter head
3. Overseas / interstate vaccination documents

**Information provided MUST include:**

- Date
- Batch number
- Vaccine brand name
- Signature of immunisation provider
- Practice/provider stamp
- Or a combination of 3 of these details
